You're not gonna believe this. My wife drug me to a cRNA dinner where the president of the cRNA association spoke. Guess what? He is on the opioid task force Committee for the state of Alabama. Needless to say I had a discussion with him about what they could do with a program that could let them know what doctors were compliant etc. He wants to meet and look at the software. I'll give you a call tomorrow

Judge Burke. During his years on the bench, he has served as President of the Alabama Appellate Judges Association and has been officer in both the Alabama District Judges Association and the Alabama Juvenile Judges Association.

Prior to serving on the Court of Appeals, Burke was appointed to be a District Judge for Marshall County. Following this appointment, he was elected to a full term on the district court beginning in 2008 without opposition. During his time as a trial judge, he created Marshall County's first family drug court and started one of the state's first domestic violence courts.

He received his undergraduate and law degrees from the University of Alabama.

Here are two in the last two months that would infringe on this patent. I sent the quest stuff to Jeremy in September but he never responded. Guess what I need to know is if they are infringing what do we need to do about it? What is the next step? If he doesn't want to mess with it let me know too and I'll get these guys from WSGR to look into it.

Strike that got an email from Holt. He says because we have a provisional we need to put these areas in the full patent app to protect us.

Whatever that means, let's get it done

Do you want to look at taking action to let them know we have filed for a patent?

What do you think we should do? I think we have to do something
